

Instructions: Use this worksheet ahead of the VFC Influenza Pre-book period to prepare for the upcoming influenza season. Then transfer this information to the myCAvax pre-book form. **Do not submit this worksheet to the VFC Program.**

Step 1

Review your current seasonal influenza data.

Estimate how many VFC doses to order for the entire upcoming influenza season.

- Run flu usage reports (registry/EHR) for the current influenza season.
- Run patient population reports by age and eligibility.
- Determine how many patients will need more than one dose.

Document the number of VFC-eligible patients.

6 months - 8 years	9 - 18 years	Total VFC-eligible patients

Patients 8 years and younger may need 2 doses

Step 2

Allocate seasonal doses by age groups served and brand preference.

- Review [available flu vaccine products \(PDF\)](#) with practice clinicians and your organization to determine which product(s) to request. (Available products for the upcoming flu season will be dependent upon demand, product availability, and doses approved by CDC.)
- Based on your patient population, order products licensed for that specific age group.
- Request **all** doses that will be needed for the upcoming influenza season by brand.
- Since different brands may arrive at different times, consider pre-booking doses from more than one brand. You may select up to a maximum of two brands from the 6 months-18 years age group but also select one from the other age groups.

Important: This is not your order for flu shipments.

6 months-18 years

Brand	# of doses
Fluarix®, GSK (6 months – 18 years) Inactivated, No Preservative, 0.5mL Single-Dose Syringe, 10 pack	
Flucelvax®, Seqirus (6 months – 18 years) Inactivated, No Preservative, 0.5mL Single-Dose Syringe, 10 pack	
FluLaval®, GSK (6 months – 18 years) Inactivated, No Preservative, 0.5mL Single-Dose Syringe, 10 pack	
Fluzone®, Sanofi (6 months – 18 years) Inactivated, No Preservative, 0.5mL Single-Dose Syringe, 10 pack	

2-18 years

Brand	# of doses
FluMist®, AstraZeneca (2 - 18 years) Live Attenuated, 0.2mL nasal sprayer, 10 pack	

18 years

Brand	# of doses
FLUAD®, Seqirus (18 years, with a solid organ transplant) Inactivated, No Preservative, 0.5mL single-dose syringe, 10 pack	
Fluzone High-Dose®, Sanofi (18 years, with a solid organ transplant) Inactivated, No Preservative, 0.5mL single-dose syringe, 10 pack	

For use in VFC-eligible patients aged 18 years with solid organ transplants & receiving immunosuppressive medications.

Step 3

Submit your VFC Flu Vaccine Pre-Book when available in January.

Login to [myCAvax](#) to pre-book **all** doses needed for the upcoming influenza season by brand.
